AI-First MVPs, Design and Software

I am an AI consultant with expertise in AI engineering, product design, UX and AI-driven business transformation. I deliver prototypes in weeks what traditionally took months.

How I Can Help
AI-First Engineering – AI-augmented coding and testing
Implement multi-agent systems
Transform legacy applications, refactoring, new features
Enable rapid prototyping and iterative development

Agentic Systems Architecture – Coordinated AI agents
Build custom agent behaviors with multiple frameworks like creweAI, sparc, Aider, Flowise, n8n

Why Work With Me?
Proven track record of successful AI builds, model selection, flow builds and prompting
User-centric approach and AI output humanisation
Focus on practical, results-driven solutions
Understanding of business needs and constraints
Experience with secure, compliant AI deployments

Recent Success Stories
Healthcare Innovation
Developing an AI-driven lab result delivery app with vision/OCR, data visualisation and CoPilot for patients and doctors

Real Estate Technology
Building an automated property analysis system, reducing analysis time from weeks to hours while improving accuracy.

Electrical Planning
Building a multimodal AI system that helps electrical engineers to speed up tedious initial planning by 10x

Hackathon Wins
In 2024 won first place in A.Team's AI Hackathon with an innovative face restoration application for plastic surgery visualization, following our 2023 second-place win for developing a generative AI car repair app at Chicago Tech Week .

Let's Talk AI
Ready to transform your development processes and implement powerful AI agent systems?
